Welcome to GISSLERprecision -  
the specialist for precision metal machining. We have been the reliable partner  
for precision machining solutions since 1986, and continue to prove our quality on a  
daily basis. Our broad range of business activities in precision metal machining  
ranges from turning, milling and grinding including surface treatment to the  
mounting of assemblies. We deliver complete solutions from one single source -  
faster, cheaper, more flexible and more reliable! We have a passion for producing  
precision metal parts and assemblies for our customers from the automotive  
industry, drive technology as well as mechanical engineering, which have proven  
successful all over the world. Repeated certifications according to ISO 9001, ISO/TS  
16949 and ISO 14001 are convincing documentation of our lived attitude in terms of  
quality and the environment. With great innovative power and technical know-how,

we manufacture precision turning parts, milling parts and grinding parts in small  
and large series - convince yourself! Made in Germany - Made by GISSLERprecision
