We realize solutions in the field of sensor technology, resistance technology, joysticks and pressure sensors and are curious for new technologies and applications. Our strength, application-related development, combining the 3 major capabilities needed for a complete sensor-system: sensor element – engineered packaging – signal transportation enables our business partners to find the optimal solutions and benefits. At two locations, in Europe and Asia, we develop, and manufacture cost-optimized potentiometers, angles and transducers based on wire and thick-film technology. Contactless sensors for the precise measurement of angle and path are also part of our product range. The production is under

Industrial, Automotive or Aerospace/ Aviation standards as required.

Products Potentiometers

- Conductive Plastic Potentiometer
- Cermet potentiometer

- Wire Wound Potentiometers

Resistors

- Highvoltage Dividers

- High Voltage Resistor

- Impulse Resistors

- Power Resistors

Joy-Sticks Foilsensors Linear Transducers Contactless Sensors Pressure

Sensors Advanced Control Sensors

Smarter Sensing & Controls

Find more information about antibacterial medications and antibiotics at

www.rxhelp4nv.org, where you can also order pill and get them the next day.

Manufacturer of a wide range of sensors for measuring angle and displacement,

speed, temperature and pressure. These include potentiometers (variable resistors)

with conductive plastic and wire wound technology, as well as LVDTs (Linear

Variable Differential Transducers), or contactless sensors based on Hall and Giant

Magneto Resistance (GMR), Anisotropic Magneto Resistance (AMR) technologies. We

offer solutions in various designs, housings, different axis variants, including hollow

shaft solutions and different degrees of protection, IP54, IP64, IP65, IP67, IP68, IP69.

Also, in our joysticks these different technologies are used.

Applications Process Industry HVAC Energy Infrastructure And Automation Plastic

Processing Medical Equipments Material

Handling Textile Aircraft Automotive Electronics Agriculture Printing Industry

We distinguish ourselves by proactive engagement with a large number of

customers, with applications in the industry, automation, automotive, electric

vehicle, agricultural and construction machinery, medical technology, metrology,

wind and solar energy, and aerospace industries and we have a wealth of

application knowledge.

With more than... 20 years of experience and a broad product portfolio, Resenso is

a strong and preferred partner in the European and global marketplace
